

PhotographersHub

Photographer Quick Guide

Everything you need to get started — sign in, build your profile, and share your work.

Open PhotographersHub in your browser.

1. Click Sign in in the top-right corner of the page.
3. Choose your preferred method: Google, email + password, or any other provider shown.
4. First time? Click Sign up instead and create an account in seconds.

After signing in for the first time you will be taken to My Photos, where you will see a connect screen with two options:

- **Link existing profile** — if an admin already created a photographer record for you, pick your name from the list and link it to your account.
- **Create new profile** — fill in your name and preferred themes to create a fresh profile from scratch.

Once your profile is linked, My Photos is your personal dashboard. Find it in the navigation menu or go directly to /my-photos.

What

Name & bio
